**The Indus Civilization** Gregory L. Possehl, 2003 Gregory Possehl marshals the state of knowledge about this fascinating culture in a readable synthesis He traces the rise and fall of this civilization examines the economic architectural artistic religious and intellectual components of this culture describes its most famous sites and shows the relationships between the Indus Civilization and the other cultures of its times As a sourcebook for scholars a textbook for archaeology students and an informative volume for the lay reader The Indus Civilization will be an exciting read

**The Ancient Indus Valley** Jane R. McIntosh, 2007-11-12 This work is a revealing study of the enigmatic Indus civilization and how a rich repertoire of archaeological tools is being used to probe its puzzles The Ancient Indus Valley New Perspectives takes readers back to a civilization as complex as its contemporaries in Mesopotamia and Egypt one that covered a far larger region yet lasted a much briefer time less than a millennium and left few visible traces Researchers have tentatively reconstructed a model of Indus life based on limited material remains and despite its virtually indecipherable written record This volume describes what is known about the roots of Indus civilization in farming culture as well as its far flung trading network sophisticated crafts and architecture and surprisingly war free way of life Readers will get a glimpse of both a remarkable piece of the past and the extraordinary methods that have brought it back to life

*Ancient Cities of the Indus Valley Civilization* Jonathan M. Kenoyer, 1998 Ancient Cities of the Indus Valley Civilization presents a refreshingly new perspective on the earliest cities of Pakistan and western India 2600 1900 BC Through a careful examination of the most recent archaeological discoveries from excavations in both Pakistan and India the author provides a stimulating discussion on the nature of the early cities and their inhabitants This detailed study of the Indus architecture and civic organization also takes into account the distinctive crafts and technological developments that accompanied the emergence of urbanism Indus trade and economy as well as political and religious organizations are illuminated through comparisons with other contemporaneous civilizations in Mesopotamia and Central Asia and through ethnoarchaeological studies in later cultures of South Asia

**The Indus** Andrew Robinson, 2021-03-08 The Indus civilization flourished for half a millennium from about 2600 to 1900 BCE when it mysteriously declined and vanished from view. It remained invisible for almost four thousand years until its ruins were discovered in the 1920s by British and Indian archaeologists. Today, after almost a century of excavation, it is regarded as the beginning of Indian civilization and possibly the origin of Hinduism. The Indus Lost Civilizations is an accessible introduction to every significant aspect of an extraordinary and tantalizing lost civilization which combined artistic excellence, technological sophistication, and economic vigor with social egalitarianism, political freedom, and religious moderation. The book also discusses the vital legacy of the Indus civilization in India and Pakistan today.

**A Peaceful Realm** Jane McIntosh, 2002 Some 5000 years ago civilized societies emerged in the valleys of four great rivers: the Nile, the Euphrates, the Yellow, and the Indus. Of these primary Old World civilizations, that of the Indus remains the least known and the most enigmatic, though paradoxically it has left perhaps the most lasting influence on the societies that followed it. In this lucid account, abundantly illustrated with maps and photographs, including sixteen pages in full color, archaeologist Jane McIntosh addresses what we know about the rise and fall of the civilization of the Indus and Saraswati valleys, what it might be reasonable to speculate, and what we still hope to learn. While drawing on archaeological and linguistic evidence to create a portrait of the civilization from the inside, McIntosh also carefully pieces together a wider picture of the Indus civilization using evidence from its trading partners in Mesopotamia, the Persian Gulf, the Indian subcontinent, and Southwest Asia. The result is an outstandingly vivid recreation of one of the world's great but all but lost ancient civilizations.

**The Indus Civilization** Irfan Habib, 2003 The Indus Civilization by Irfan Habib is the second monograph in the People's History of India series. It continues the story from the point reached in the earlier monograph, Prehistory. The dominant theme here is provided by the Indus Civilization. In addition, other contemporary and later cultures down to about 1500 BC and the formation of the major language families of India are discussed. The time with which this monograph deals is often called Protohistory, since it is close to the period when history can at least partly be reconstructed from literary texts. Since modern territorial boundaries make little sense when we deal with the past, India here means pre-partition India, and the area covered includes Afghanistan south of the Hindu Kush mountains. A sub-chapter is accordingly devoted to the Helmand civilization, whose study is indispensable for putting the Indus civilization in a proper perspective. Irfan Habib, formerly Professor of History, Aligarh Muslim University, is author of The Agrarian System of Mughal India (1956, 1963, 2nd rev. edn. 1999), An Atlas of the Mughal Empire (1982), and Essays in Indian History: Towards a Marxist Perception (1995). He has also authored Prehistory (2001) and Indian Economy, 1858-1914 (2006) and co-authored The Vedic Age (2003) and Mauryan India (2004) in the People's History of India series. Two sections of this monograph need to be singled out for their fine treatment: one is note 2.1 on the Indus script, and the other is the section on language change before 1500 BC. The author is also to be commended for bringing up the thorny subject of the Indus civilization and the Rigveda, a fine overview of the subject. The Book Review

Deciphering the Indus Script Asko Parpola, 2009-10-01 Of the writing systems of the ancient world which still await deciphering the Indus script is the most important It developed in the Indus or Harappan Civilization which flourished c 2500 1900 BC in and around modern Pakistan collapsing before the earliest historical records of South Asia were composed Nearly 4 000 samples of the writing survive mainly on stamp seals and amulets but no translations Professor Parpola is the chief editor of the Corpus of Indus Seals and Inscriptions His ideas about the script the linguistic affinity of the Harappan language and the nature of the Indus religion are informed by a remarkable command of Aryan Dravidian and Mesopotamian sources archaeological materials and linguistic methodology His fascinating study confirms that the Indus script was logo syllabic and that the Indus language belonged to the Dravidian family

Dawn and Devolution of the Indus Civilization Shikaripur Ranganatha Rao, 1991 The author puts forth convincing evidence to prove that the decline of Indus Valley cities was not due to the invasion of barbaric Aryans unsympathetic to civilization but due to natural calamities such as floods desiccation and tectonic activity A strong Aryan substratum was already present in the Indus Civilization during its early days and continued to the last leaving its indelible impression on the fabric of Indian culture Tired of natural disasters the Harappans migrated to the Sarasvat Ghaggar Drishadvati Chautang Yamun and Gang valleys in the East and to Gujarat and Narmada valleys in the South There they lived in small villages selling their skill to the local population and transformed the political and

**The Roots of Hinduism** Asko Parpola, 2015-07-15 Hinduism has two major roots. The more familiar is the religion brought to South Asia in the second millennium BCE by speakers of Aryan or Indo-Iranian languages, a branch of the Indo-European language family. Another more enigmatic root is the Indus civilization of the third millennium BCE, which left behind exquisitely carved seals and thousands of short inscriptions in a long forgotten pictographic script. Discovered in the valley of the Indus River in the early 1920s, the Indus civilization had a population estimated at one million people in more than 1000 settlements, several of which were cities of some 50,000 inhabitants. With an area of nearly a million square kilometers, the Indus civilization was more extensive than the contemporaneous urban cultures of Mesopotamia and Egypt. Yet after almost a century of excavation and research, the Indus civilization remains little understood. How might we decipher the Indus inscriptions? What language did the Indus people speak? What deities did they worship? Asko Parpola has spent fifty years researching the roots of Hinduism to answer these fundamental questions, which have been debated with increasing animosity since the rise of Hindu nationalist politics in the 1980s. In this pioneering book, he traces the archaeological route of the Indo-Iranian languages from the Aryan homeland north of the Black Sea to Central West and South Asia. His new ideas on the formation of the Vedic literature and rites and the great Hindu epics hinge on the profound impact that the invention of the horse-drawn chariot had on Indo-Aryan religion. Parpola's comprehensive assessment of the Indus language and religion is based on all available textual, linguistic, and archaeological evidence, including West Asian sources and the Indus script. The results affirm cultural and religious continuity to the present day and, among many other things, shed new light on the prehistory of the key Hindu goddess Durga and her Tantric cult.

Empires of the Indus: The Story of a River Alice Albinia, 2010-04-05 Alice Albinia is the most extraordinary traveler of her generation. A journey of astonishing confidence and courage. Rory Stewart. One of the largest rivers in the world, the Indus rises in the Tibetan mountains and flows west across northern India and south through Pakistan. It has been worshipped as a god, used as a tool of imperial expansion, and today is the cement of Pakistan's fractious union. Alice Albinia follows the river upstream through two thousand miles of geography and back to a time five thousand years ago when a string of sophisticated cities grew on its banks. This turbulent history, entwined with a superlative travel narrative, *The Guardian* leads us from the ruins of elaborate metropolises to the bitter divisions of today. Like Rory Stewart's *The Places In Between*, *Empires of the Indus* is an engrossing personal journey and a deeply moving portrait of a river and its people.

In Search of the Cradle of Civilization Georg Feuerstein, Subhash Kak, David Frawley, 2005 In this pathbreaking book, the authors show that the ancient Indians were no primitives but possessed a high spiritual culture which not only influenced the evolution of the Western world in decisive ways but which still has much to teach us today. India's archaic spirituality is codified in the rich symbols, metaphors, and myths of the magnificent Rig Veda, which is shown to be much older than has been widely assumed by scholars. The present book also unravels the astonishing mathematical and astronomical code hidden in the Vedic hymns. Anyone interested in ancient cultural history, India, archaeo-astronomy, or spirituality will find this well-researched and cross-cultural work spellbinding and enriching.
